Meta Ray-Ban Display: The Future of AI Wearables

The next generation of wearable technology that seamlessly blends AI with everyday life

Look Up, Stay Present: The Vision Behind Meta AI Glasses

Stay Engaged

Designed to keep you present in the world around you, not distracted by your phone screen

Personal Superintelligence

Integrates AI seamlessly into your day, providing instant access to information and assistance

Powerful & Intuitive

Combines stylish, classic design with powerful, intuitive technology that works naturally

Introducing Meta Ray-Ban Display

Meta Ray-Ban Display represents the first consumer-ready smart glasses featuring a built-in, full-color, high-resolution display. The innovative display is discreetly positioned in the right lens, appearing only when needed.

This groundbreaking technology offers a revolutionary new paradigm for interacting with digital content and AI assistants—transforming how we access information throughout our day.

Key Features: See and Do More, Effortlessly

In-Lens Display

Check messages, preview photos, see real-time translations, and receive Meta AI prompts at a glance without reaching for your phone

Integrated Audio

Built-in microphones and open-ear speakers deliver clear sound for calls and seamless AI interaction while staying aware of your surroundings

Smart Camera

Capture photos and video in 3K resolution hands-free, preserving moments without breaking your flow or fumbling for devices

The Meta Neural Band: Intuitive Control

01

Hands-Free Interaction

Respond to texts, answer calls, and control media without touching any device

02

Gesture-Based Navigation

Designed for intuitive, natural gestures that feel effortless and responsive

03

Voice Commands

Access Meta AI and control features using simple voice commands for ultimate convenience

Design Philosophy: Style Meets Substance

Classic Ray-Ban Aesthetics

Blends timeless, iconic design with cutting-edge technology for a look that never goes out of style

Comfort First

Focused on wearability and a design that "gets out of the way," letting you forget you're wearing technology

Personal Expression

Available in various styles and colors to match your personal preferences and lifestyle

Enhanced Capabilities: Beyond the Basics

Conversation Focus

Amplifies the voice of the person you're talking to in noisy environments, ensuring clear communication in any setting

Extended Battery Life

Up to 8 hours of mixed use for the Ray-Ban Meta (Gen 2) models, keeping you powered throughout your day

Future Integrations

Planned integrations with services like Garmin and Strava for performance tracking and enhanced functionality

The Evolution of AI Wearables

AI Accessibility

Meta's commitment to making AI more accessible and integrated into daily life for everyone

Continuous Improvement

These glasses are engineered to improve over time as AI technology advances and capabilities expand

Human Enhancement

A step towards a future where technology enhances human capabilities seamlessly and naturally

Meta Ray-Ban Display: Experience the Next Paradigm Shift

Stay Present

Interact with your digital world without breaking your flow or losing connection with your surroundings

Stay Connected

Maintain awareness while accessing information, messages, and AI assistance instantly

Unlock Superintelligence

Access your "personal superintelligence" that enhances your capabilities throughout the day

The future of wearable technology is here—transforming how we interact with information and stay connected to the world around us.
